description	1B7		1A7		
The SN74CBT16245 device provides 16 bits of	1B8		1A8		
high-speed TTL-compatible bus switching in a	2B1		2A1		
standard '16245 device pinout. The low on-state	2B2		2A2		
resistance of the switch allows connections to be	GND		GND		
made with minimal propagation delay.	2B3		2A3		
made with minimal propagation delay.	2B4		2A4		
The device is organized as two 8-bit low-impedance	Vcc		V <sub>CC</sub>		
switches with separate output-enable $(\overline{OE})$ inputs.			2A5		
When $\overline{OE}$ is low, the switch is on, and data can	2B6 🛓		2A6		
flow from the A port to the B port, or vice versa.	GND		GND		
When $\overline{OE}$ is high, the switch is open, and the	2B7	22 27	2A7

# SN74CBT16245 16-BIT FET BUS SWITCH

SCDS070C - JULY 1998 - REVISED OCTOBER 2000

#### logic diagram (positive logic)

#### absolute maximum ratings over operating free-air temperature range (unless otherwise noted)<sup>†</sup>

Supply voltage range, V <sub>CC</sub>		–0.5 V to 7 V
Input voltage range, V <sub>I</sub> (see Note 1)		–0.5 V to 7 V
Continuous channel current		128 mA
Input clamp current, I <sub>IK</sub> (V <sub>I/O</sub> < 0)		–50 mA
Package thermal impedance, $\theta_{JA}$ (see Note 2):	: DGG package	70°C/W
	DGV package	58°C/W
	DL package	63°C/W
Storage temperature range, T <sub>stg</sub>		65°C to 150°C

<sup>†</sup> Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTES: 1. The input and output negative-voltage ratings may be exceeded if the input and output clamp-current ratings are observed.

2. The package thermal impedance is calculated in accordance with JESD 51-7.

#### recommended operating conditions (see Note 3)

		MIN	MAX	UNIT
VCC	Supply voltage	4	5.5	V
VIH	High-level control input voltage	2		V
VIL	Low-level control input voltage		0.8	V
Т <sub>А</sub>	Operating free-air temperature	-40	85	°C

NOTE 3: All unused control inputs of the device must be held at V<sub>CC</sub> or GND to ensure proper device operation. Refer to the TI application report, *Implications of Slow or Floating CMOS Inputs*, literature number SCBA004.

# SN74CBT16245 16-BIT FET BUS SWITCH

SCDS070C - JULY 1998 - REVISED OCTOBER 2000

#### **TEST CONDITIONS** PARAMETER MIN TYP<sup>†</sup> MAX UNIT -1.2 VIK $V_{CC} = 4.5 V,$ $I_{I} = -18 \text{ mA}$ V VI = 5.5 V $V_{CC} = 0,$ 10 Ιį μΑ $V_{CC} = 5.5 V,$ $V_I = 5.5 V \text{ or } GND$ ±1 3 ICC V<sub>CC</sub> = 5.5 V, $I_{O} = 0$ , $V_I = V_{CC} \text{ or } GND$ μΑ Control inputs ∆lcc‡ $V_{CC} = 5.5 V_{,}$ One input at 3.4 V, Other inputs at V<sub>CC</sub> or GND 2.5 mΑ Control inputs $V_{I} = 3 V \text{ or } 0$ 3.5 pF Ci $\overline{OE} = V_{CC}$ 4.5 pF Cio(OFF) $V_{O} = 3 V \text{ or } 0,$ $V_{CC} = 4 V,$ $V_{I} = 2.4 V_{,}$ 20 $I_{I} = 15 \text{ mA}$ 14 TYP at $V_{CC} = 4 V$ 7 5 $I_{I} = 64 \text{ mA}$ Ω ron§ $V_{I} = 0$ 7 V<sub>CC</sub> = 4.5 V $I_1 = 30 \text{ mA}$ 5 $V_{I} = 2.4 V_{,}$ $I_{I} = 15 \text{ mA}$ 8 12

electrical characteristics over recommended operating free-air temperature range (unless otherwise noted)

<sup>†</sup> All typical values are at  $V_{CC}$  = 5 V (unless otherwise noted),  $T_A$  = 25°C.

<sup>‡</sup>This is the increase in supply current for each input that is at the specified TTL voltage level rather than V<sub>CC</sub> or GND.

§ Measured by the voltage drop between the A and B terminals at the indicated current through the switch. On-state resistance is determined by the lower of the voltages of the two (A or B) terminals.

# switching characteristics over recommended operating free-air temperature range (unless otherwise noted) (see Figure 1)

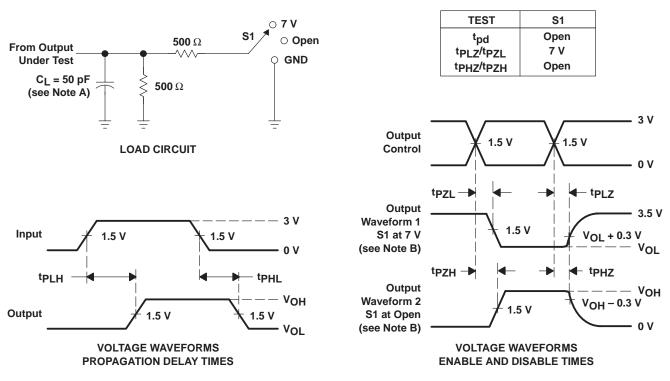

PARAMETER	FROM (INPUT)	TO (OUTPUT)	V <sub>CC</sub> = 4 V	= V <sub>CC</sub> ± 0.	UNIT	
		(001201)	MIN MAX	MIN	MAX	
t <sub>pd</sub> ¶	A or B	B or A	0.35		0.25	ns
t <sub>en</sub>	OE	A or B	6.1	1.2	5.6	ns
tdis	OE	A or B	7.5	3.9	7.7	ns

The propagation delay is the calculated RC time constant of the typical on-state resistance of the switch and the specified load capacitance, when driven by an ideal voltage source (zero output impedance).

# SN74CBT16245 16-BIT FET BUS SWITCH

#### SCDS070C - JULY 1998 - REVISED OCTOBER 2000

#### PARAMETER MEASUREMENT INFORMATION

NOTES: A. CL includes probe and jig capacitance.

- B. Waveform 1 is for an output with internal conditions such that the output is low except when disabled by the output control. Waveform 2 is for an output with internal conditions such that the output is high except when disabled by the output control.
- C. All input pulses are supplied by generators having the following characteristics: PRR  $\leq$  10 MHz, Z<sub>O</sub> = 50  $\Omega$ , t<sub>f</sub>  $\leq$  2.5 ns, t<sub>f</sub>  $\leq$  2.5 ns.
- D. The outputs are measured one at a time with one transition per measurement.
- E.  $t_{PLZ}$  and  $t_{PHZ}$  are the same as  $t_{dis}$ .
- F.  $t_{PZL}$  and  $t_{PZH}$  are the same as  $t_{en}$ .
- G.  $t_{PLH}$  and  $t_{PHL}$  are the same as  $t_{pd}$ .

<sup>(1)</sup> The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

<sup>(2)</sup> Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

**Pb-Free (RoHS):** TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

**Pb-Free (RoHS Exempt):** This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

<sup>(3)</sup> MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

**Important Information and Disclaimer:**The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

#### **IMPORTANT NOTICE**

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
